BLUE TANG TITANIUM

DROP POINT KNIFE

Retail \$ 121.99
ON SALE \$ 84.99

Safety matters—don't dive without the Blue Tang™ Titanium knife.

Getting caught in netting or fishing line is a dangerous and common occurrence. The Blue Tang Titanium is designed with a hook at its base to help you easily cut through any entanglement. It has a locking mechanism on its sheath so it won't fall off underwater. Solid titanium blade is 100% corrosion resistant & Nonmagnetic Hollow ground straight and serrated knife edges for Quick disassembly for cleaning, Serrated edge for cutting rope and line. Hooked edge line cutter. One hand insertion and removal from sheath.

The main purpose of a secondary, or back-up, dive light is to protect the diver during a night-time dive in the event the primary dive light fails. Secondary dive lights are typically more compact, lightweight, and feature a narrower beam.

Secondary dive lights are smaller, so they easily fit into a BC pocket and are also ideal for exploring under ledges or the cracks and crevices of a

reef. Our secondary dive lights are designed to be incredibly compact; the Mini Q40 is virtually unnoticed in your BC pocket. Additionally, our Mini Q40 has a mask attachment strap which provides hands-free lighting for viewing gauges, camera controls and marine life up close.

Retail \$34.95
ON SALE \$27.99

The Mini Q40 outshines many lights three times its size.

FEATURED PACKAGE

**HAPPY HOLIDAYS
FROM HIGH SIERRA
DIVERS**

LIGHT CANNON 100

The Light Cannon 100 was the world's first alkaline-powered HID light and it is still the most popular. This light is revered among videographers and those who appreciate the clean and clear quality of its light. We've redesigned it to be energy efficient, providing a boost in brightness with no increase in battery usage. It is the brightest dive light available for your money.

use batteries more quickly. The principal features of LED and HID are their unmatched brightness, longevity, and energy efficiency.

Primary dive lights can be used for daytime or nighttime dives. They are typically larger, with wide beams.

**Retail \$ 349.99
ON SALE \$ 189.99**

Xenon versus LED and HID Dive Lights

Many of our primary dive lights are available in Xenon (Incandescent), LED (Light Emitting Diode) or HID (High Intensity Discharge) versions. Dive lights using Xenon are generally less expensive, but typically do not provide the brightness of an LED or HID and tend to
